SKF's High School of Technology - Gothenburg, Sweden

ABOUT ME

I am a happy and curious person who gets pleasure from expressing my creativity. I prefer to do that by programming, dancing Cuban salsa, and singing in a pop choir. I use my remaining time to exercise, spend time with friends over a good movie, explore the city, and take walks in nature. My closest goal is to establish myself as a professional web developer, and therefore I am right now looking for an LIA-internship during week 35-42 (2024) and week 2-21 (2025).
